

# United States of America-born

Victorian Community Profiles: 2016 Census

#### **CONTENTS**

## Acknowledgements Notes on the data

#### **Tables**

- 1 Distribution within Australia of USA-born: 2016, 2011
- 2 Number of USA-born by Top Twenty Local Government Areas and their Major Suburbs, Victoria: 2016
- 3 Number of USA-born by Top Twenty Local Government Areas, Victoria: 2016, 2011
- 4 Year of Arrival of USA-born and Total Victorian Overseas-born: 2016
- 5 Year of Arrival by Top Twenty Local Government Areas, USA-born, Victoria: 2016
- 6 Age Groups of USA-born and the Total Victorian Population: 2016, 2011
- 7 Total Persons Identified with American Ancestry by Top Twenty Local Government Areas, Victoria: 2016, 2011
- 8 Country of Birth (Top Twenty plus Australia) of Persons of American Ancestry, Victoria: 2016, 2011
- 9 Languages Spoken at Home (Top Twenty), USA-born and the Total Victorian Population: 2016, 2011.
- 10 Languages Spoken at Home (Top 3) by Top Twenty Local Government Areas, USA-born, Victoria, 2016
- 11 Proficiency in Spoken English, USA-born, Victoria: 2016, 2011
- 12 Proficiency in Spoken English by Top Twenty Local Government Areas, USA-born, Victoria: 2016
- 13 Religious Affiliation (Top Twenty), USA-born and the Total Victorian Population: 2016, 2011
- 14 Religious Affiliation (Top Three) by Top Twenty Local Government Areas, USA-born, Victoria: 2016
- 15 Type of Internet Connection, USA-born and the Total Victorian Population: 2016, 2011
- 16 Type of Internet Connection by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 17 Highest Level of Educational Attainment, USA-born and Total Victoria: 2016, 2011
- 18 Highest Level of Educational Attainment by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 19 Labour Force Participation, USA-born and Total Victoria: 2016, 2011
- 20 Labour Force Participation by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 21 Occupation of USA-born and Total Victoria: 2016, 2011
- 22 Occupation by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 23 Industry of Employment, USA-born and Total Victoria: 2016, 2011
- 24 Industry of Employment by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 25 Voluntary Work, USA-born and Total Victoria: 2016, 2011
- 26 Voluntary Work by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 27 Total Personal Income (Weekly), USA-born and Total Victoria: 2016
- 28 Total Personal Income (Weekly) by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 29 Housing Tenure Type, USA-born and the Total Victorian Population: 2016, 2011
- 30 Housing Tenure Type by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 31 Family Composition, USA-born and the Total Victorian Population: 2016, 2011
- 32 Citizenship Status, USA-born and the Total Victorian Population: 2016
- 33 Citizenship Status by Top Ten Local Government Areas, USA-born: 2016, 2011
- 34 Core Activity Need for Assistance, USA-born and the Total Victorian Population: 2016, 2011
- 35 Core Activity Need for Assistance by Top Ten Local Government Areas, USA-born, Victoria: 2016
- 36 Usual Address Five Years Ago by Top Ten Local Government Areas, USA-born and Total Victoria: 2016

#### **Figures and Maps**

- Figure 1 Geographic Distribution of USA-born in Metropolitan Local Government Areas, Victoria: 2016
- Figure 2 Age and Gender Distribution of USA-born and of the Total Victorian Population: 2016, 2011 (including tables on age in five year groups, and sex distribution, persons and percentage)
- Map 1 Victoria State, Local Government Areas and Regional Advisory Councils Regions, 2016
- Map 2 Metropolitan Melbourne, Local Government Areas and Regional Advisory Councils Regions, 2016

#### **Acknowledgements**

The Multicultural Affairs and Social Cohesion Division, Department of Premier and Cabinet, would like to acknowledge the valuable contribution made by the Australian Bureau of Statistics in the preparation of this report. The report is based on data from the 2016, 2011 and 2006 Census of Population and Housing. The Census provides the the Australian community, including planners and policy makers, with a detailed source of information about the composition of Australian society and how it has changed over time.

If you would like to receive this publication in an alternative format, please email the Multicultural Affairs and Social Cohesion Division, Department of Premier and Cabinet, on multicultural@dpc.vic.gov.au. This document is available in PDF format on the internet at www.multicultural.vic.gov.au.

#### **Disclaimer**

This publication has been prepared with data and terminology supplied by the Australian Bureau of Statistics only for the purpose of disseminating information for the benefit of the public. No warranty is given as to the accuracy, reliability, currency or completeness of the information. The State of Victoria accepts no liability for any loss or damage that may be incurred by any person from the use, interpretation or reliance on the information provided.

#### Source of data in this publication

Australian Bureau of Statistics, Census of Population and Housing, 2016, 2011 and 2006.

#### Notes on the Data

These notes relate to the Birthplace Community Profiles, and detail some important considerations regarding the classifications used and comparability issues between Census years. For more general information about what is collected in the Census and the meaning of various categories, please see the Australian Bureau of Statistics (ABS) Census Dictionary, 2016, Catalogue No. 2901.0 on the ABS Website www.abs.gov.au, which also contains the other publications mentioned in these notes.

#### **Confidentiality and Introduced Random Error**

Many classifications used in ABS statistics have an uneven distribution of data throughout their categories. For example, the number of people who are Anglican or born in Italy is quite large (3,101,185 and 174,042 respectively in 2016), while the number of people who are Buddhist or born in Chile (563,674 and 26,086 respectively in 2016), is relatively small. When religion is cross-classified with country of birth, the number in the table cell who are Anglican and who were born in Italy could be small, and the number of Buddhists born in Chile even smaller. These small numbers increase the risk of identifying individuals in the statistics.

Even when variables are more evenly distributed in the classifications, the problem still occurs. The more detailed the classifications, and the more of them that are applied in constructing a table, the greater the incidence of very small cells.

Care is taken in the specification of tables to minimise the risk of identifying individuals. In addition, a technique has been developed to randomly adjust cell values. Random adjustment of the data is considered to be the most satisfactory technique for avoiding the release of identifiable Census data. When the technique is applied, all cells are slightly adjusted to prevent any identifiable data being exposed. These adjustments result in small introduced random errors. However, the information value of the table as a whole is not impaired. The technique allows very large tables to be produced even though they contain numbers of very small cells.

The counts and totals in summary tables are subjected to small adjustments. These adjustments may cause the sum of rows or columns to differ by small amounts from table totals. The counts are adjusted independently in a controlled manner, so the same information is adjusted by the same amount. However, tables at higher geographic levels may not be equal to the sum of the tables for the component geographic units.

It is not possible to determine which individual figures have been affected by random error adjustments, but the small variance which may be associated with derived totals can, for the most part, be ignored.

No reliance should be placed on small cells as they are impacted by random adjustment, respondent and processing errors.

Many different classifications are used in Census tables and the tables are produced for a variety of geographical areas. The effect of the introduced random error is minimised if the statistic required is found direct from a tabulation rather than from aggregating more finely classified data. Similarly, rather than aggregating data from small areas to obtain statistics about a larger standard geographic area, published data for the larger area should be used wherever possible.

When calculating proportions, percentages or ratios from cross-classified or small area tables, the random error introduced can be ignored except when very small cells are involved, in which case the impact on percentages and ratios can be significant.

#### Local Government Areas and new ABS Geography

The Local Government Area (LGA) is part of the Non-ABS Structure of the ASGS and the ABS will continue to support LGAs with the data it currently provides. There were no boundary changes between Local Government Areas (LGAs) in Victoria between 2011 and 2016.

#### Census variables

The following describes Census topics presented in this publication. (Please refer to the *Census Dictionary*, 2016).

#### Country of Birth of Person

This variable indicates in which country a person was born and is coded using the *Standard Australian Classification of Countries (SACC)*, *2016*, Catalogue No. 1269.0. Change of names of countries between censuses should be noted when making time series comparisons. Examples are provided below:

Some country name changes from 2011 to 2016:

<u>2011</u> <u>2016</u>

Former Yugoslav Republic of Macedonia (FYROM) FYR of Macedonia

Myanmar, The Republic of the Union of Myanmar
Bolivia, Plurinational State of Bolivia
Venezuela, Bolivarian Republic of Venezuela

#### Indigenous Status

This provides responses of persons who identified themselves as being of Australian Aboriginal and/or Torres Strait Islander origin.

#### Year of Arrival

This states for persons born overseas, the year they first arrived in Australia with the intention of staying for at least one year. The variable Country of Birth of Person is the basis for determining if a person was born in Australia or overseas. The year 2016 refers to the period from 1st January 2016 to 9th August 2016 only.

#### Ancestry

Ancestry is coded using the *Australian Standard Classification of Cultural and Ethnic Groups* (*ASCCEG*), 2016, Catalogue No.1249.0. There are two ancestry variables, First and Second Response, because respondents to the Census are asked to report up to two ancestries. Respondents do not have the option of ranking their answers to the ancestry question, so where a respondent reports two ancestries, those two ancestries have equal standing. The two ancestry variables are combined into one variable Ancestry Multi-Response, or Total Responses as used in this publication.

#### Age

This contains a person's age, and is collected for each person. Age is calculated from date of birth, however if this is not provided, stated age will be used. If neither is provided, age is imputed.

#### Language Spoken at Home

This records responses to the Census question "Does the person speak a language other than English at home?", and is coded using the *Australian Standard Classification of Languages (ASCL), 2016*, Catalogue No. 1267.0. This question allows for one answer only.

#### Proficiency in Spoken English

This variable classifies their self-assessed proficiency in spoken English for each person who speaks a language other than English at home.

#### Religious Affiliation

Religions are coded using the *Australian Standard Classification of Religions Groups (ASCRG)*, 2016, Catalogue No. 1266.0. The variable records a person's religious affiliation. Answering this Census question is optional.

#### **Dwelling Internet Connection**

This variable records whether any member of the household accesses the internet from the dwelling, through a desktop/laptop computer, mobile or smart phone, tablet, music or video player, gaming console, smart TV or any other devices. It also includes accessing through any type of connection, for example, ADSL, fibre, cable, wireless, satellite and mobile broadband (3G/4G).

#### Level of Highest Educational Attainment

This variable combines "Non-School Qualification: Level of Education" and "Highest Year of School Completed" to produce a single measure of a person's overall level of educational attainment, whether it be a school or non-school qualification.

#### Labour Force Status

This variable records, for the week prior to Census night, a person's labour force status. The category, "Employed, away from work" also includes persons who stated they worked but who did not state their number of hours worked.

#### Occupation

Occupation is coded using the *Australian and New Zealand Standard Classification of Occupations* (*ANZSCO*), 2013, Version 1.2, Catalogue No. 1220.0. The Occupation code assigned to a response is based on the occupation title and tasks of the main job held during the week prior to Census night.

#### Industry of Employment

Industry of Employment is coded using the *Australian and New Zealand Standard Industrial Classification (ANZSIC)*, 2006 Revision 2.0, Catalogue No. 1292.0.

#### Voluntary Work

This variable records people who spent time doing unpaid voluntary work through an organisation or group, in the twelve months prior to Census Night. It excludes work done as part of paid employment; if main reason is to qualify for Government benefit, obtain an educational qualification or due to a community work order: and in a family business

#### Total Personal Income (Weekly)

This indicates the total income that the person usually receives each week.

#### Tenure Type

This describes whether a dwelling is owned, being purchased or rented. Dwellings occupied under a life tenure scheme can be considered as being owned.

#### Family Composition

Family Composition classifies families into different types. When classifying families into different types, information about temporarily absent family members is used.

No provision has been made in Family Composition to classify family members outside the family nucleus. For example, in a family which contains a couple and their dependent children, plus a parent of one of the couple, the latter would be recorded as an "Other related individual". Identification of such persons within a family is done by means of "Relationship in household" data.

#### Citizenship

This records whether a person has Australian citizenship.

#### Core Activity Need for Assistance

This measures the number of people with a profound or severe disability. People with a profound or severe disability are defined as those people needing help or assistance in one or more of the three core activity areas of self-care, mobility and communication because of a disability, long term health condition (lasting six months or more) or old age.

#### Usual Address 5 years ago

This is derived from the mark box answer to the question on the 2016 Census form which asks, "Where did the person usually live five years ago (at 9 August 2011)?". This variable shows migration patterns when used with the "Usual Address Census Night Indicator", "Usual Address One Year Ago Indicator" and "Place of usual residence" data.

#### **Abbreviations**

Category names have been shortened where they do not fit within the columns or rows in the tables in this publication. The commonly used abbreviations include:

nfd Not further defined nec Not elsewhere classified

na Not available or Not applicable

Alia Australia Vic Victoria

COB Country of Birth OSB Overseas-born

LOTE Language other than English LGA Local Government Area

MESC Main English-speaking Countries
NMESC Non-Main English-speaking Countries

<sup>(</sup>a)Includes accessing the internet through a desktop/laptop computer, mobile or smart phone, tablet, music or video player, gaming console, smart

TV or any other devices.

It also includes accessing through any type of connection for example ADSL, fibre, cable, wireless, satellite and mobile broadband.

<sup>&</sup>lt;sup>(b)</sup>Other Local Government Areas include "No usual address" and "Unincorporated Victoria".

 $<sup>^{(</sup>c)}$  This table only counts persons who were enumerated at their usual residence on Census night.

 $<sup>^{\</sup>mbox{\scriptsize (d)}}$  Persons counted in non-private dwellings, migratory and off-shore areas.
